

Yifan Yang

Tel: +1 617-909-9768, Email: yifany@csail.mit.edu, <https://yang-yifan.github.io/>

RESEARCH INTERESTS

Computer Architecture, Accelerator for Sparse and Irregular Applications, HW/SW Co-design,
Domain-specific Accelerator, Graph Analytics, FPGA

EDUCATION

Massachusetts Institute of Technology, EECS

Cambridge, MA

Ph.D. in Electrical Engineering and Computer Science

September 2019 - present

S.M. in Electrical Engineering and Computer Science

September 2019 - June 2021

- GPA: 5.0/5.0
- Thesis advisor: Prof. Daniel Sanchez and Prof. Joel Emer
- Thesis title: Architectural Support for Efficient Processing of Sparse and Irregular Applications
- Coursework: Computer System Architecture, Hardware Architecture for Deep Learning, Advances in Computer Vision, Theory of Computation

Tsinghua University, Department of Physics

Beijing, China

B.S. in Mathematics and Physics

August 2015 - July 2019

- GPA: 3.90/4.00
- Thesis advisor: Prof. Leibo Liu
- Thesis title: A Message Passing-based Graph Processing Framework on CPU-FPGA Heterogeneous System
- Selected coursework: Fundamental of Digital Logic and Processor, Digital Integrated Circuit Analysis and Design (English), Computer Organization and Architecture, Operating System, Principles and Practice of Compiler Construction, Distributed Computing, Principles of Analog Circuits, Data Structure, Introduction to Artificial Intelligence, Autonomous Driving

RESEARCH EXPERIENCE

Graduate Research Assistant

September 2019 - present

MIT Computer Science and Artificial Intelligence Laboratory

Cambridge, MA

- Advisor: Prof. Daniel Sanchez and Prof. Joel Emer
- Worked on leveraging inter-layer pipelining to accelerate sparse CNNs
 - Proposed input-stationary output-stationary (IS-OS) dataflow that minimizes inter-layer storage requirement
 - Designed the **ISOSceles** accelerator that implements IS-OS dataflow to efficiently pipeline multiple sparse layers in CNNs
 - Conducted end-to-end evaluation of ISOSceles on several sparse CNNs and achieved large speedup and off-chip traffic reduction over state-of-the-art accelerators
- Worked on offering architectural support to accelerate irregular applications using data compression
 - Designed **SpZip**, specialized hardware support for traversing and generating compressed data structures in irregular applications
 - Proposed the Dataflow Configuration Language (DCL) for the SpZip programmable hardware
 - Evaluated SpZip using zsim simulation on a broad set of irregular applications, results show large performance gains and data movement reductions over prior systems

Undergraduate Research Assistant
Research Center for Mobile Computing, Tsinghua University

March 2017 - August 2019
Beijing, China

- Advisor: Prof. Leibo Liu
- Worked on designing graph processing framework across the hardware software interface

Proposed the asynchronous Block Coordinate Descent (BCD) view of iterative graph algorithms to reveal the algorithmic and system trade-offs on achieving fast algorithm convergence

Designed **GraphABCD**, an asynchronous graph processing framework on heterogeneous system

Prototyped GraphABCD whole system in Verilog on Intel HARPv2 CPU-FPGA heterogeneous platform

Undergraduate Research Assistant
Berkeley Artificial Intelligence Research Lab (BAIR), UC Berkeley

July 2018 - September 2018
Berkeley, CA

- Advisor: Prof. Kurt Keutzer, collaboration with Kees Vissers and Michaela Blott from Xilinx Research Labs
- Worked on co-designing Convolutional Neural Network and its hardware accelerator

Designed **DiracDeltaNet**, a hardware efficient neural network targeting image classification task

Quantized DiracDeltaNet down to 4bit weight and 4bit activations with minor accuracy loss

Designed and implemented **Synetgy**: the hardware accelerator for DiracDeltaNet on embedded FPGA using HLS

INDUSTRY & TEACHING EXPERIENCE

Platform Architecture Intern
Platform Architecture, Apple

May 2022 - August 2022
Cupertino, CA

- CPU cache subsystem performance research

Graduate Teaching Assistant
[6.812/6.825 Hardware Architecture for Deep Learning](#), MIT

January 2022 - May 2022
Cambridge, MA

- Held recitations and office hours

- Developed and graded lab assignments and paper review sessions
- Mentored and graded final design projects

HONORS & AWARDS

- MIT Jacobs Presidential Fellowship *Cambridge, 2019*
- Chi-sun Yeh Nominee Prize (8%) *Beijing, 2019*
- CNPC Scholarship (5%) *Beijing, 2018*
- National Scholarship (1/91) *Beijing, 2017*
- Outstanding Award in the 35th Tsinghua ‘Challenge Cup’ (Top 6/381)
(Student Extracurricular Academic Science and Technology Works Competition) *Beijing, 2017*
- Zhang Mingwei Scholarship (10%) *Beijing, 2016*

TECHNICAL SKILLS

Programming: C/C++, Python, Verilog, System Verilog, Vivado HLS, Unix/Linux, Golang, R, MATLAB, Assembly

Tools: Intel Pin, zsim, Intel(Altera) toolchain (Quartus, Qsys), Xilinx toolchain (Vivado, Vivado HLS, PYNQ), Modelsim, VCS, Pytorch

Updated on March 8, 2023
